ARUN NEGI

SENIOR ENGINEER | AZURE • INFRASTRUCTURE AS CODE • AUTOMATION

+91 7895-9698-08 | heyarunnegi@gmail.com | linkedin.com/in/aroonnegi

PROFESSIONAL SUMMARY

Senior Engineer with 5 years of Azure infrastructure, automation and migration experience. Skilled in Terraform, CI/CD, scripting, cross-team delivery, mentoring and cloud cost optimization.

TECHNICAL SKILLS

Azure infrastructure & security: Networking, Key Vault, Managed Identities, RBAC, Azure Policy, Storage, IaaS/PaaS, Azure Migrate.
Integration & compute: Service Bus, Event Hubs, Azure Functions; Linux, Windows; limited AWS exposure.

Infrastructure & DevOps: Terraform, ARM templates, Jenkins, GitHub Actions, CI/CD, Git, Bitbucket.
Automation & development: Python, PowerShell, JSON, Azure REST API, Azure Automation, BDD.

PROFESSIONAL EXPERIENCE

Kenvue | Senior Engineer - Cloud & Infrastructure

Sep 2024 - Present

Bengaluru, Karnataka, India

- Contributed to the CloudX-to-KCloud migration, which delivered **USD 1.5 million in project savings**.
- Independently delivered cloud optimization that generated **USD 136,000 in savings**.
- Led application migrations from VMware Cloud and AWS to Azure, plus legacy-to-modern Azure transitions; used Azure Migrate for server discovery, replication and lift-and-shift deployments.
- Resolved **networking issues during migration and application reconfiguration**, adapting connectivity to differences between legacy and new network architectures.
- Developed reusable **Terraform modules** and **cloud automations** for whitelisted services, automating service enablement and infrastructure provisioning within restricted environments.
- Migrated code from **Bitbucket to GitHub**; coordinated architecture reviews, migration planning and progress updates with application owners and cross-functional teams.

Insight | Cloud Engineer II

Sep 2021 - Aug 2024

Noida, Uttar Pradesh, India | Key project: Johnson & Johnson

- Automated **Azure workflows** with **Python and PowerShell**, improving operational efficiency by **98%** while reducing manual provisioning effort and errors.
- Built **event-driven Azure Functions** using Python and Azure REST API, reducing manual tasks by **40%** and improving overall operational efficiency by **25%**.
- Developed **Azure Automation runbooks** for IaaS and RBAC across **600+ subscriptions**; engineered **cost-management solutions** across multiple Azure services.
- Implemented **Jenkins CI/CD pipelines** and Python BDD tests for service whitelisting; designed **Azure policies** and service architectures to support governance and **GxP compliance**.
- Delivered **proofs of concept** for Azure Data Share, Functions and Storage; maintained technical documentation and **mentored team members** on Azure policies and best practices.

CERTIFICATIONS & TRAINING

Microsoft: DevOps Engineer Expert (AZ-400), Jun 2022; Azure Developer Associate (AZ-204), Mar 2021; Azure AI Fundamentals (AI-900) and Azure Data Fundamentals (DP-900), May 2021.
KodeKloud: Kubernetes for the Absolute Beginners, Sep 2024.

EDUCATION

B.Tech (Hons.), Computer Science - Cloud Computing
Graphic Era Hill University | Dehradun, Uttarakhand, India
